

THINKING MAPS[®]

Comprehension Strategies for Constructing Meaning

March 20, 2017 | Bakersfield, California

Comprehension Strategies for Constructing Meaning

is a guide for existing Thinking Maps schools and classrooms where improving reading comprehension is the goal.

Participants in the training will:

- ◆ Understand the major comprehension strategies supported by research and demonstrate how to connect these strategies with Thinking Maps
- ◆ Acquire in-depth knowledge of the specific comprehension strategies: prediction, visualization, making connections, summarizing and synthesizing, questioning, and inference. They will also be able to couple these strategies with Thinking Maps. They will learn when and how to use each strategy.
- ◆ Learn strategies to scaffold reading comprehension from the abstract to the concrete
- ◆ Understanding that the pairing of Thinking Maps and comprehension is not text based, but strategy based
- ◆ Track and assess students' reading comprehension
- ◆ Show students how to authentically and flexibly apply all of the strategies when reading independently

If you are interested in bringing a team to this training, please complete the registration form and fax or mail it to our office in Cary, North Carolina
